1. PUBLISHABLE EXECUTIVE SUMMARY - SLOVAKIA

The public administration in education is guaranteed by both the State administration and territorial self-governance, which is executed by municipalities and higher territorial units. The Central body of state administration in education is the Ministry of Education, Science, Research and Sport of the Slovak Republic, which develops educational aims, content and methods for education. Local administration is the responsibility of municipalities, which provide most of pre-primary, primary and lower secondary education in Slovakia. Public schools provide education free of charge.

The levels of educational system in Slovakia:

1. The first stage of education system is **pre-primary education**, attended by children from three to six years and provided by kindergartens. Up to September 2021 is pre-primary education for 5 years old children obligatory in Slovakia (as preparing for school).
2. **Primary and lower secondary education** is organised as a single structure system, beginning at the age of six and consisting of nine years. Education is carried out by primary school, where child starts fulfil compulsory school attendance.

The compulsory schooling lasts ten years and pupils complete it by finishing the first year of upper secondary education.

3. **Upper secondary education** takes four years, is finishing by final secondary-school examination. This examination is required for higher education. The absolvents of this education are on level 5 of EQF.
4. **Higher education** is provided at the three levels in autonomous universities and higher education institutions
 - EQF level 6 = Bachelor (Bc.)
 - EQF level 7
 - Master (Mgr., Mgr. art.), Engineer (Ing., Ing. arch.), in medical area MUDr., MDDr., MVDr.,
 - with special exam after the university study exam - doctor of natural science (RNDr.), doctor of philosophy (PhDr.), doctor of pharmacy (PharmDr.), jura (JUDr.), doctor of pedagogic (PaedDr.), doctor of theology (ThDr.)
 - EQF level 8 = doctoral (graduand) study programs, postgradual study and scientific study programs
 - philosophiae doctor (PhD.), artis doctor (ArtD.), licency of theology (ThLic.)
 - Study programmes may combine two levels of higher education into one whole.

Regarding the project aims we concentrate on level 6-8 of EQF in this desk-research.

Higher education in Slovakia

Higher education in the Slovak Republic is provided by higher education institutions with accredited study programmes. Fulfilment of accreditation conditions is assessed by the Slovak Accreditation Agency for Higher Education (SK). The Agency decides on the granting (or not granting) of appropriate accreditations under the law. Higher education institutions may ask for study programme accreditation in any field of study.

The study programs may consist of either one or several fields. The higher education is achieved in the respective field of study or in the combination of the fields.

A study field is that area which is the subject of education; it is defined by its content, which is determined by the area and extent of knowledge and skills set out in the graduate profile. A study programme is a set of subjects with rules for their completion. A successful completion of the subjects will result in obtaining higher education.

The system of study fields - a list of study programmes (SK) in which higher education institutions in the Slovak Republic can provide higher education - is administered by the Ministry of Education, Science, Research and Sport in the Slovak Republic.

The Slovak Accreditation Agency for Higher Education gives its statement to all changes in the system.

The system of study fields also includes descriptions of study fields, which specify their content as well as outcomes of education at the given level and field of study. The profile of a study programme graduate, conditions for the regular completion of the study, and organisation of the study are in the self-administration competence of the higher education institution. Higher education institutions are, however, obliged to subordinate the study organisation to the credit system.

The study programmes may be provided in the full-time and part-time form of study. The full-time form of study is characterised by the daily participation of students in educational activities. The part-time form is characterised mainly by individual study and consultations.

In compliance with the Act on Higher Education, the Ministry creates, updates and publishes a Long-term plan for education, research, development, artistic, and other creative activities for higher education institutions (SK) every year. The long-term plan of the ministry is created for five to ten years.

The academic year starts on 1st September and ends on 31st August of the following calendar year in agreement with the Act on higher education. The higher education institution decides if the academic year is structured into two semesters or three trimesters. The number of weeks of each semester/trimester and the number of weeks in which the education, examination session or holidays take place are determined by each higher education institution itself.

Higher education in the Slovak Republic is provided by:

- 20 public higher education institutions,
- 3 state higher education institutions,
- 12 private higher education institutions, and
- 5 foreign higher education institutions.

The following report offers an overview of the main trends in the field of training of cultural heritage professions and tourism.

2. EU DEFINITIONS OF FORMAL, NON-FORMAL AND INFORMAL EDUCATION

2.1 Formal education

Formal learning is the learning that occurs in an organised and structured environment (e.g. in an education or training institution or on the job) and is explicitly designated as learning (in terms of objectives, time or resources). Formal learning is intentional from the learner's point of view. It typically leads to validation and certification.

2.2 Non-Formal education

Non-formal learning is a learning which is embedded in planned activities not always explicitly designated as learning (in terms of learning objectives, learning time or learning support), but which contains an important learning element. Non-formal learning is intentional from the learner's point of view.

2.3 Informal education

Informal learning means a learning resulting from daily activities related to work, family or leisure. It is not organised or structured in terms of objectives, time or learning support. Informal learning is mostly unintentional from the learner's perspective.

3. EDUCATION SYSTEM IN EACH COUNTRY

6.2 Non-formal education

6.2.1 Name of training course (for each course please complete the following template)

Field of education	<input type="checkbox"/> post graduate <input type="checkbox"/> vocational training courses <input type="checkbox"/> adult training courses
Sustaining organisation	
Type of sustaining organisation	<input type="checkbox"/> public <input type="checkbox"/> private
Name of sustaining organisation	
Country of sustaining organisation	
Duration of educational activity	
Legislative basis	
Preconditions (Recognition of educational credentials and prior learning, Admission rules and restrictions, Admission procedure)	
Location (city and country)	
Working language	
Acquired (academic) title, qualification, professional level	
To what entitles this education? d. Access to further education e. Access to occupations	
Curriculum / Content of education (Modules, Elements etc)	
Background of teachers and trainers	

6.3 Informal education

6.3.1 Name of training course (for each course please complete the following template)

Field of education	<input type="checkbox"/> post graduate <input type="checkbox"/> vocational training courses <input type="checkbox"/> adult training courses
Sustaining organisation	
Type of sustaining organisation	<input type="checkbox"/> public <input type="checkbox"/> private
Name of sustaining organisation	
Country of sustaining organisation	
Duration of educational activity	
Legislative basis	
Preconditions (Recognition of educational credentials and prior learning, Admission rules and restrictions, Admission procedure)	
Location (city and country)	
Working language	
Acquired (academic) title, qualification, professional level	
To what entitles this education? f. Access to further education g. Access to occupations	
Curriculum / Content of education (Modules, Elements etc)	
Background of teachers and trainers	

7. CONCLUSION

7.1 Summary of achievements

The analysis of Slovak situation of education level 6 - 7 shows that majority of education in area of cultural heritage is offered in formal way by universities and study programs are concentrated on 3rd group of future occupations – cultural heritage managers.

In the area of maintenance managers and crafts persons there are only few specialized programs offered in education system. There is also an offer of specialized lessons by traditional study programs.

In all the universities is to feel a movement in offering of specialized programs regarding the changes in EU discussions and growing interest on cultural heritage. The Universities cooperate in Erasmus programs and bring specialized projects with target on cultural heritage.

The actual education in area of crafts persons is in Slovakia concentrated in dual system of high schools. And this can be a reason, why there is a gap in study programs offer in group of maintenance manager and crafts persons. It would be interesting to know the whole system of education. There are differences in EU countries regarding the traditions and the political changes in last 30 years.

This desk research should be taken only as first step of the analysis. It will be complemented and explained in the discussions during next project steps (meetings and workshops with the competent and responsible persons for the building of education system and study programs).
